Video Message from Minister of Education for Graduating Students

Please find attached congratulatory videos addressed to this year's graduating students from Minister of Education, Stephen Lecce.

For the last few months, students have taken extraordinary steps and shown great flexibility to continue their learning journey. Their accomplishments, especially in these unprecedented circumstances, are a testament to the importance of education and its impact on their future success.

Although graduations will look a little different this year, it is important to recognize and celebrate this milestone for those graduating from Kindergarten, Grade 8 and Grade 12 as they start a new chapter in their lives.

The Minister asks if you could kindly share these videos with families and students in your schools.
